EXAMINER

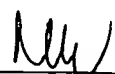

FADOK, MARK A

ART UNIT PAPER NUMBER

3625

DATE MAILED: 09/13/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/880,036	Applicant(s) SEKITANI, HIROYUKI	
	Examiner Mark Fadok	Art Unit 3625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 June 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ng (US 5,445,347) in view of Smith et al (US 5,931,877).

In regards to claim 1, Ng discloses a part retrieving system for production machines utilizing a network, the system being characterized in that the system comprises a part database (col 8, lines 10-15) and

a terminal connected to the part database via a communication network for bi-directional communications with the part database (col 8, lines 17-25 and FIG 5),

said part database has information on parts accumulated therein (col 8, lines 15-40),

the parts constituting each of production machines having different specifications (Col 8, technical data and multiple production items, i.e. items 14 and 16). , and

said terminal comprises part information requesting means for requesting said part database to transmit the part information (col 8, lines 15-35),

Ng teaches requesting parts data information from a remote database and interactively communicating, but does not specifically mention that the data is stored at the users location (col 8, lines 20-25). Smith teaches storing information in an intermediate location at the users site (col 6, lines 30-37). It would have been obvious to a person having ordinary skill in the art to include in Ng, the local storage capability as described by Smith, because the requested information will require a download of a significant amount of data, so having the information local as is notoriously well known, increases the speed at which the data can be accessed and manipulated, thus making the system more efficient. and

retrieval means for retrieving parts from the stored part information depending on retrieval conditions (col 8, lines 20-25).

In regards to claim 2, Ng discloses the system being characterized in that said part information requesting means transmits information including identification information on the individual production machines (abstract, train 18 and cars 16 and 14),

said database extracts, in response to said transmission request, information on parts concerning a production machine specified by said identification information (Col 8, lines 25-35, parts cross reference) and

transmits the information as machine-specific part information comprising a group of pieces of part information on a specific production machine (col 8, lines 25-31).

Claim 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Ng as in view of Smith and further in view of Official Notice.

In regards to claim 3, Ng teaches selection means and graphics displays (see col 8), but does not specifically mention that there is a menu provided for selection purposes. It was old and well known in the art at the time of the invention to provide selection menus. It would have been obvious to a person having ordinary skill in the art to include in Ng, providing selection menus for the different parts, because this was a

notoriously well known method for providing a means for less advanced individuals to get to required information, thus allowing less trained individuals to use the system.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mark Fadok** whose telephone number is **(703) 605-4252**. The examiner can normally be reached Monday thru Thursday 8:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Vincent Millin** can be reached on **(703) 308-1065**.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Receptionist** whose telephone number is **(703) 308-1113**.

Any response to this action should be mailed to:

Commissioner for Patents

P.O. Box 1450

Alexandria, Va. 22313-1450

or faxed to:

(703) 872-9306 [Official communications; including
After Final communications labeled

Art Unit: 3625

"Box AF"]

(703) 746-7206 [Informal/Draft communications, labeled

"PROPOSED" or "DRAFT"]

Hand delivered responses should be brought to Crystal Park 5, 2451 Crystal
Drive, Arlington, VA, 7th floor receptionist.

A handwritten signature in black ink, appearing to read 'Mark Fadok', with a stylized flourish at the end.

Mark Fadok

Patent Examiner
